

PointGuard™

Unattended Single Direction Traffic Controller
If you have trouble controlling vehicle traffic thru access control points, controlled exits or vehicles entering thru gate exit lanes, look no further!

About

APEX Fabrication and Design is devoted to making high quality durable traffic solutions. Manufactured from durable 1/4" A-36 Steel, the APEX PointGuard will withstand the abuse of everyday operation. PointGuard are a cost effective low security solution. Designed to inhibit aggressors from entering or leaving through unauthorized lanes, PointGuard can be installed quickly and effectively and can also be maintained at a relatively low cost compared to larger vehicle barriers. PointGuard is an excellent solution for rental car lots, parking garages and low security entries and exits.

Benefits

- Controls the direction of traffic
- Choose from in-ground or flush-mounted models
- Disables all vehicles traveling in wrong direction
- Easily installed by bolting into asphalt or cement
- Ramp height with teeth down is only 2"
- Almost any width entrance can be controlled
- Available with a 1/4" standard or 3/8" steel
- No excavation is needed on flush-mounted models
- Hot-Dipped Galvanized available for beach areas or extremely salty, wet areas
- Allows for quick "locking" mode for changing traffic flow
- Available in 3' sections

Installation

Assemblies are professionally installed by our certified contractor partners within your region to ensure the highest grade of quality and signature service.

Finish

- Assemblies are hot-dipped galvanized (optional)
- Points (teeth) are hot-dipped galvanized
- Standard painted top plates (red or yellow)
- Springs are stainless steel

Accessories

- Drop arm barriers
- Traffic warning signs
